

## Print. Present. Promote.

Getting people's attention today is a challenge – there is so much marketing material around competing for attention. A home-made marketing leaflet/flyer tends to look home-made and can make the wrong impression on your audience!

An A5, two sided leaflet is one of the most popular marketing tools for businesses, whether it's for an exhibition, a networking event, a direct mail campaign or for leafleting drops. A well designed and produced leaflet is a must.

### You need to think about:

The service or product you want to present. The message you want to communicate and the audience you're presenting it to.

## What you get at Reflect

- Initial consultation
- A choice of 2 professional designs to choose from, branded with your logo
- Stock image search if required\*
- Guaranteed quality production
- The finished product delivered direct to your door

\* chosen images are purchased at an additional cost.
